

**AMENDMENTS TO THE CLAIMS, COMPLETE LISTING OF CLAIMS**  
**IN ASCENDING ORDER WITH STATUS INDICATOR**

Please add the following new claims.

1. (Original) A sparkling laminate film comprised of a substrate, a metal vapor deposited layer formed on a front surface of said substrate, a transparent resin surface layer formed on the front surface of said metal vapor deposited layer, and a backing material integrally bonded to a back surface of said substrate through an adhesive layer.

2. (Original) A sparkling laminate film as set forth in claim 1, wherein said substrate is comprised of a polyester-based resin with a high flexibility.

3. (Original) A sparkling laminate film as set forth in claim 1, wherein said metal vapor deposited layer has a thickness of 150 to 750Å.

4. (Original) A sparkling laminate film as set forth in claim 1, wherein said transparent resin surface layer is made of one of an acryl-based resin and a urethane-based resin.

5. (Original) A sparkling laminate film as set forth in claim 1, wherein a hue angle ( $H^{\circ}$ ) when measuring the color of said transparent resin surface layer is in a range of 245 to 265.

6. (Original) A sparkling shaped article comprised of a shaped body and a sparkling laminate film as set forth in claim 1 integrally bonded with that body.

7. (New) A sparkling laminate film comprised of a substrate, a metal vapor deposited layer formed on a front surface of said substrate, a transparent resin surface layer formed on the front surface of said metal vapor deposited layer, and a backing material integrally and directly bonded to a back surface of said substrate through an adhesive layer.

8. (New) A sparkling laminate film as set forth in claim 7, wherein said substrate is comprised of a polyester-based resin with a high flexibility.

9. (New) A sparkling laminate film as set forth in claim 7, wherein said metal vapor deposited layer has a thickness of 150 to 750Å.

10. (New) A sparkling laminate film as set forth in claim 7, wherein said transparent resin surface layer is made of one of an acryl-based resin and a urethane-based resin.

11. (New) A sparkling laminate film as set forth in claim 7, wherein a hue angle ( $H^\circ$ ) when measuring the color of said transparent resin surface layer is in a range of 245 to 265.

12. (New) A sparkling shaped article comprised of a shaped body and a sparkling laminate film as set forth in claim 7 integrally bonded with that body.
